

NEW COLOR

THE CREATION TAN WOBURN

The inspiration for the new Woburn color comes from the village of St-Augustin-de-Woburn, located in the Eastern Townships of the Quebec region. Being described as a forest village where its economy is derived from wood processing, we wanted to take inspiration from this natural resource to offer you an inspiring color. So small in population, however, so big in offering a breathtaking scenery from the top of these peaks of 1100 meters above sea level.

The Feltküter team has worked hard to offer you a trendy and up-to-date color. During an outdoor excursion, we found our inspiration for the creation of this new color. Among all the elements found in nature, the wood and the beauty of the autumn leaves have guided our creativity throughout this exploration.

Combining simplicity and naturalness, the Beige Woburn allowed us to extend our color gradient from the Feltküter collection. Being a little darker than our Beige Perce color and getting closer to the color of the Cork, it will harmonize in all simplicity with the decor of your projects.
