

Circuit Index-Design

This year marked the 5th edition of the circuit taking place in the Quartier Design Royalmount on September 27th. The Circuit Index-Design is an interactive tour allowing participants to get in touch with several Montreal addresses in the field of design and architecture. The encouragement of local manufacturers is increasingly being promoted by consumers, this is why the exhibition is so popular.

*Having experienced the Circuit Index-Design last year with our distributor Richelieu, Feltküter did not hesitate to participate in this exhibition again this year. During the day, Richelieu's team presented **the novelties** of the Feltküter collection. In the coming weeks, we will inform you with more details of the new colors and more!*

*Richelieu and Feltküter congratulate the winner of the **contest**, Catherine Séguin - Interior Designer. She won a gift basket and a gift card of 200\$. Participants had to find the number of pulls in a basket. The exact quantity was 247 pulls and Mrs. Séguin inscribed 249 pulls.*

Thank you for your participation!
