

ANDROMEDA

ACOUSTICAL BAFFLE SYSTEM

Our new acoustical baffle system, Andromeda, from the new Constellation collection by Feltkütür is now available.

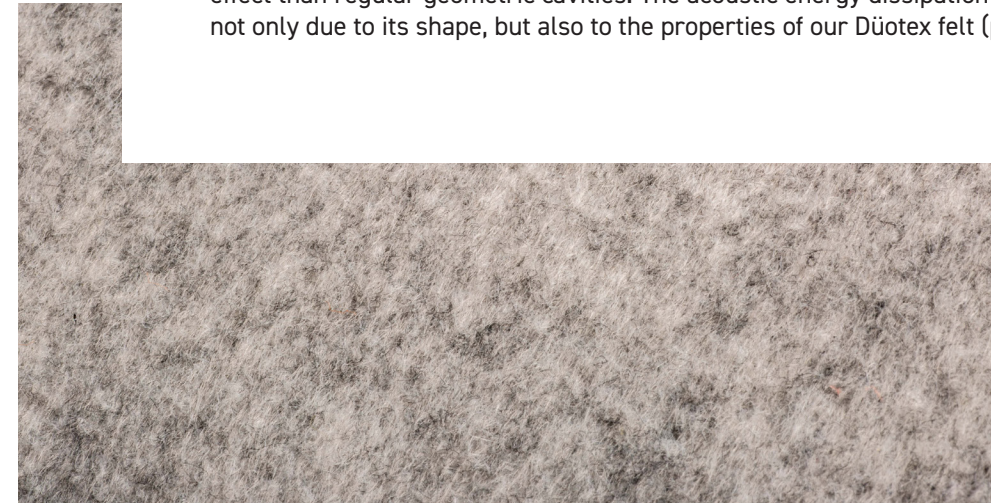

ANDROMEDA

The Andromeda baffle design consists of chevron, a decorative pattern in the shape of a V or, as we usually call it, in the shape of a zigzag. It is a very interesting decorative line if you are looking for a creative and unique interior design.

The zigzag design will look beautiful wherever you decide to hang it. This original decorative pattern will enhance your design and your environment.

THE ACOUSTIC PERFORMANCE

The irregular cavities of the Andromeda ceiling baffle system produce a better noise dampening effect than regular geometric cavities. The acoustic energy dissipation of the irregular cavities is not only due to its shape, but also to the properties of our Düotex felt (porosity, resistivity, etc.).
