DE VINCI

FELTKÜTUR INTRODUCES ITS NEW MODEL
OF ACOUSTIC HANGING SCREENS, DE VINCI,
PART OF THE RENAISSANCE COLLECTION.

THE ACOUSTIC HANGING SCREEN

The De Vinci acoustic hanging screen model offers an artistic visual effect with linear lines, allowing daylight to pass through while providing a privacy screen. These lines represent a movement, a progression according to the direction of the design. Influencing the perception of things around us, this template is ideal for any office environment.

ACOUSTICS

The semi-perforated acoustic hanging screen is a good marriage of visual and acoustic privacy. Although this model offers a certain proportion between the surface of felt and the perforated, this panel creates sound attenuation in the environment in which it is installed.

THE INSTALLATION

Thanks to the hardware provided with the acoustic hanging screen, it is easy to hang the products from several types of ceilings.

feltkütür

MONA

THE MONA MODEL IS AN ACOUSTIC HANGING SCREEN CREATED BY FELTKÜTUR AND IS PART OF THE RENAISSANCE COLLECTION.

DESIGN

The Mona acoustic hanging screen model offers a clean look, thanks to its curved lines, keeping the space open while giving a space divider effect. These perforations having linear and curved forms signify plenitude, indicating that which is complete, in all its force of movement. This model is extremely versatile, but it is natural to find the Mona model in relaxation areas, work environments, or any space for relaxation and rejuvenation.

THE INSTALLATION

Thanks to the hardware provided with the acoustic hanging screen, it is easy to suspend the products from several types of ceilings.

THE ACOUSTIC HANGING SCREEN

The Mona model is simple, minimalist, and refined. Its multiple openings allow light emitted by the room to pass through while creating a visual division of the room.

GALILEO

THE GALILEO ACOUSTIC HANGING SCREEN
IS PART OF THE RENAISSANCE COLLECTION
CREATED BY FELTKÜTUR.

THE ACOUSTIC HANGING SCREEN

The Galileo model will charm the artistic eye of users, thanks to the sizes of changing shapes, thus offering a very artistic visual effect. This given effect will act in favor of people's concentration.

PROVIDES A VISUAL AND ACOUSTIC BARRIER

With more pronounced perforations at the top of the acoustic hanging screen, it allows light to pass through the room while providing visual and acoustic privacy, thanks to the smaller perforations at the bottom. For your open-plan workspaces, this type of design will meet your needs.

THE INSTALLATION

Thanks to the hardware provided with the hanging screen, it is easy to suspend the products from several types of ceilings.

DESCARTES

FELTKÜTUR ADDS THE NEW MODEL OF
ACOUSTIC HANGING SCREENS, DESCARTES, TO
THE RENAISSANCE COLLECTION.

THE ACOUSTIC HANGING SCREEN

The Descartes acoustic hanging screen model is composed of round shapes signifying lightness, joy, softness, movement, and infinity. Being directly related to noble concepts such as eternity or recurring cycles, such as sunrise and sunset, it will allow users of the environment to carry out their thoughts. It fits well in several environments, but we can see it in cafeteria areas to create a division of space.

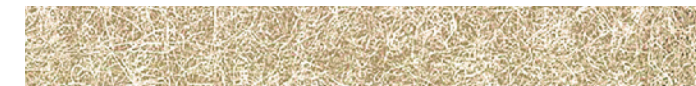

A PRIVACY SCREEN

The proportion of cutouts being larger for this acoustic hanging screen lets the light of the room pass while offering a screen of intimacy given its presence. It is ideal in a collaborative environment. Although the acoustic hanging screen has a sound absorption capacity, it is important to place it in strategic places, such as at the very source of the sound emission and in places where the sound bounces.

THE INSTALLATION

Thanks to the hardware provided with the acoustic hanging screen, it is easy to suspend the products from several types of ceilings.

FILIPPO

FILIPPO IS THE TRENDY ACOUSTIC HANGING SCREEN MODEL FROM THE RENAISSANCE COLLECTION BY FELTKÜTUR.

THE ACOUSTIC HANGING SCREEN

At first glance, the foliage of the Filippo model makes it irresistible. This is quite normal since the reproduction or arrangement of foliage is one of the most frequently used ornamental motifs in design and architecture. Offering a soft and soothing effect, it will fit perfectly in any environment!

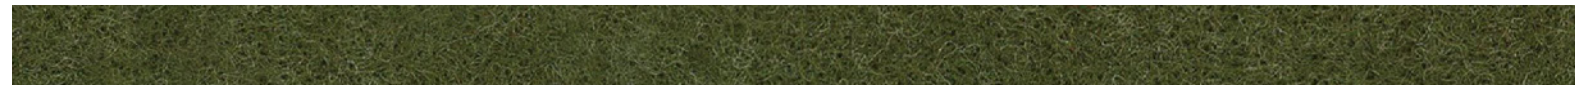

ACOUSTICS

The semi-perforated acoustic hanging screen is a good marriage of visual and acoustic privacy. Although this model offers a certain proportion between the surface of felt and the perforated, this panel allows sound attenuation in the environment in which it is installed.

THE INSTALLATION

Thanks to the hardware provided with the acoustic hanging screen, it is easy to suspend the products from several types of ceilings.

GIOTTO

THE ACOUSTIC HANGING
SCREEN MODEL GIOTTO IS
THE ABSTRACT DESIGN OF
THE RENAISSANCE COLLECTION
BY FELTKÜTUR.

THE ACOUSTIC HANGING SCREEN

Abstract forms rely particularly on references based on external knowledge. Their meaning can change from person to person depending on specific forms and contexts. Let your imagination guide you with Giotto!

DEFINE THE SPACES

It is possible to create a completely different atmosphere in your environment, thanks to this panel. It offers a stylish touch to enhance your decor. The felted effect of this acoustic hanging screen keeps the felted appearance of the acoustic panels. Having a cup of good hot coffee near this panel will be very comforting!

ACOUSTIC SIMPLICITY

If your concept seeks to offer relaxation and inspiration, this model is perfect to create your desired atmosphere. Users will thank you.

THE INSTALLATION

Thanks to the hardware provided with the acoustic hanging screen, it is easy to suspend the products from several types of ceilings.

VASARI

FELTKÜTUR INTEGRATES ITS NEW MODEL OF ACOUSTIC HANGING SCREEN, VASARI, INTO THE RENAISSANCE COLLECTION.

THE ACOUSTIC HANGING SCREEN

The Vasari acoustic hanging screen model offers a straight horizontal linear design. It signifies simplicity, rigor, and determination. It is an interesting decorative product if you are looking for a creative and unique interior design.

TRY IT AND YOU'LL LOVE IT!

IDEAL FOR LARGE SPACES

It allows you to create a separation between the offices of the rear neighbors to delimit your own workspace. This model contributes to the visual design of your space. Thanks to its shape, the acoustic hanging screen allows the light emitted by the lighting to pass through.

THE INSTALLATION

Thanks to the hardware provided with the acoustic hanging screen, it is easy to suspend the products from several types of ceilings.

CARTIER

THE CARTIER ACOUSTIC HANGING SCREEN IS PART OF THE RENAISSANCE COLLECTION CREATED BY FELTKÜTUR.

THE ACOUSTIC HANGING SCREEN

In design, triangular shapes signify liveliness, theology, and balance. To complete your decoration while remaining neutral, our acoustic hanging screen will bring a touch of elegance to your space without being eccentric.

The Cartier model is timeless and adds charm to all types of environments, such as entrance halls, open-plan offices, and restaurants.

ACOUSTICS

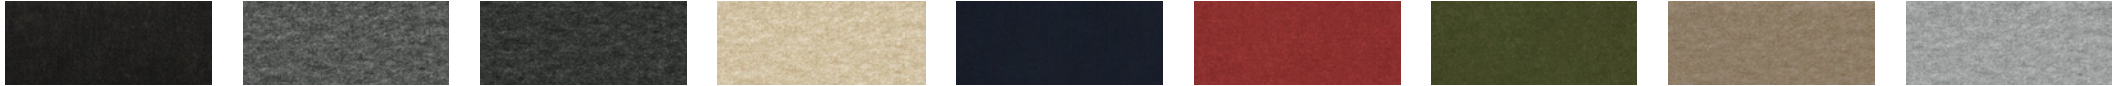

The semi-perforated acoustic hanging screen is a good marriage of design and acoustics. These irregular shapes reduce the sound intensity in the room. Although this model offers a certain proportion between the surface of felt and the perforated, it allows sound attenuation in the environment in which it is installed. Even if the acoustic hanging screen has a sound absorption capacity, it is important to place it in strategic places, such as at the very source of the sound emission and in places where the sound bounces.

THE INSTALLATION

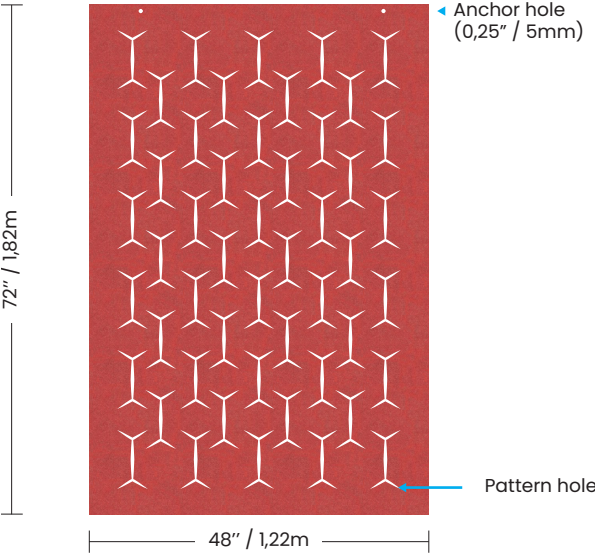

Thanks to the hardware provided with the acoustic hanging screen, it is easy to suspend the products from several types of ceilings.
